

# DO-254 Hardware Verification Testing

Pinnacle Aerospace can help you attain the hardware design assurance levels required for your hardware project. We can assist you in navigating the complexities of DO-254 and reduce your compliance risk. We have experienced partnerships with DER's and have experience in all life cycle phases of your hardware verification project including:

- Safety Assessment
- Compliance Planning and Project Management
- Requirements Assessment, Development, Analysis & Trace
- Standards Development
- Microcode Design Support, Coding and Review
- Verification Testing
- Integration and Board Support
- Documentation & DER Support
- Tool Development

Headquartered in Phoenix Arizona, we offer top quality, low cost nearshore engineering solutions using experienced employees from our primary design center located in Ciudad Obregon, Mexico. Our value proposition is simple: ***Deliver high value solutions using low cost nearshore resources.***

**“Aerospace quality at IT prices, on a nearshore time zone convenient for you”**

- Expertise in nearly all areas of certification and qualification
- Project management using Web and MyMobile™ Technology for worldwide real time status reporting.
- Independent quality assurance organization
- Quality management system exceeding AS9100/AS9006 guidelines
- Board Support Package development
- Multiple sourcing models providing capacity optimized to your project needs
- Automated business processes to reduce overhead and lower costs
